-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

All remaining rejections follow. All rejections not appearing in the present Office action were withdrawn due to applicants amendment except for the rejection under 35 USC 103 relying on Chin which was withdrawn based on applicants statement of common assignment or obligation of assignment.

Claims 1 and 7-20 are rejected under 35 U.S.C. 102(e) as anticipated by Chin et al. (US 6,444,754).

Patentees in Example 3 disclose a process in which a polystyrene produced by polymerization of styrene in the presence of a nitroxyl compound having a glycidyl group is contacted at 235-275 degrees centigrade with thermoplastics having epoxy reactive groups such as polyamide or PPE. Note Example 3 in this re and also that styrenic block copolymer is present. Since the glycidyl group containing polystyrene would be expected by those skilled in the art to be reactive with at least the sort of end units expected to be present in PPE and polyamide as well as the maleic anhydride moieties and residual unsaturation of the SEBS (admittedly which would be present in very small amounts), those skilled in the art would assume a graft would be formed.

When the reference discloses all the limitations of a claim except a property or function, and the Examiner cannot determine whether or not the reference inherently possesses properties which anticipate or render obvious the claimed invention, basis exists for shifting the burden of proof to applicant. Note In re Fitzgerald et al. 619 F. 2d 67, 70, 205 USPQ 594, 596, (CCPA 1980). See MPEP § 2112-2112.02.

Applicant's arguments filed 9-28-07 have been fully considered but they are not persuasive. The instant claims species of the moiety "X" such as the second and fourth species recited in claim 1 (i.e. alkyl-CH-aryl) such as encompasses Chins' species resulting from use of the nitroxide at column 21, lines 14-22.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication should be directed to Jeffrey C. Mullis
M-F, 9-5pm at telephone number 571 272 1075.
